

DEEP CREEK DISTRIBUTION SYSTEM (13)

AND

MOSBY IRRIGATION COMPANY

YEAR 2000 WATER REPORT

COMMISSIONER CHARMAN JUSTICE  
January 30, 2001

There was very little Deep Creek water in April. In May the water increased because we had several days of rain. I don't think any one got wet over because the water was in very short supply. Mosby water was run on a 12 and 15 s.f. duty. Mosby water was never on a 30 ft duty all year.

In September the water was shut off at Blanchet Park to work on the pipeline.

There has been fences built with no gates, so there is no access to the diversion's without climbing barb wire fences and walking.

Deep Creek called a meeting on November 1, 2000. to talk about bringing the upper Deep Creek filing holders into the system. Only 4 people came and they didn't want to bring the whole upper Deep Creek, Just Robert Young.
